## Govt to revise electricity tariff

SHARIFAH MAHSINAH ABDULLAH
**KOTA BARU**
news@nst.com.my

THE government will revise the electricity tariff from this year to 2024 in a bid to ease the burden of the people.

Energy and Natural Resources Minister Datuk Seri Takiyuddin Hassan said the decision on the matter would be announced soon.

He said the government had studied the matter by taking into account the situation in the country, which was recovering from the Covid-19 pandemic and its resulting economic crisis.

"There are about eight million electricity customers in the country and 85 per cent of them are domestic users, while the rest are commercial users.

"I would like to give my assurance that the new rates will not burden the people, especially domestic users, and the announcement would be made soon," the Kota Baru member of parliament said after handing over donations to several non-governmental organisations and clubs at his parliamentary service centre here yesterday.

Takiyuddin said based on statistics, there were about 40,000 heads of families who were Tenaga Nasional Bhd (TNB) domestic account holders.

"The government has been providing assistance to the people to help ease their burden, including cash aid to buy electrical appliances," he said.

On a related issue, he said the electric supply in states affected by floods, including in Selangor and Pahang, had been fully restored.

"TNB is repairing the electrical poles that are damaged by the floods, and the repair costs may reach hundreds of millions of ringgit."
