Gunung Jerai report to be submitted on Nov 26

KUALA LUMPUR: The Minerals and Geoscience Department is preparing the Gunung Jerai Slope Risk and Hazard Mapping Report which will be submitted to the National Disaster Management Agency on Nov 26. This is following the landslide and water surge at Gunung Jerai on Aug 18 that caused flooding in the surrounding areas. Energy and Natural Resources Deputy Minister, Datuk Ali Biju said the department was identifying sites at Gunung Jerai to develop a geological disaster early warning system. "The department has conducted the geological, geomorphological and geological engineering analyses to identify the slope locations at risk of collapsing and for water surge hazard mapping," he said in the Dewan Rakyat yesterday. **Bernama**
