ELECTRICITY GENERATION

## Sand Nisko unit partners Fabulous Sunview in solar farm project

**KUALA LUMPUR:** Sand Nisko Capital Bhd's wholly owned subsidiary, Len Cheong Industries Sdn Bhd, has signed a memorandum of understanding (MoU) with Fabulous Sunview Sdn Bhd to collaborate on a large-scale solar (LSS) farm project in Melaka.

According to filing with Bursa Malaysia yesterday, the two companies will submit the LSS tender application of up to 100MWac to the Sustainable Energy Development Authority.

Sand Nisko managing director Emily Sow Mei Chet said in a statement it planned to kick off its collaboration with Fabulous Sunview by installing a solar photovoltaic (PV) system on factory buildings in Melaka and Seremban of up to 4,400 kilowatts peak (kWp).

Fabulous Sunview is a leading solar power system provider and solar installation company.

The company provides turnkey solutions from engineering, procurement, construction, commissioning, subcontracting and other solar-related services.

Len Cheong's subsidiary, Len Cheong Resources Sdn Bhd, had on Dec 1 inked a joint-venture agreement with Mutiara Mahajuta Sdn Bhd to develop a parcel of land in Alor Gajah, Melaka.

The first phase involves a sustainable agro-tourism project, namely an aquaponic solar farm.

The electricity generated from the farm would have a capacity of between 50MWac and 100MWac.

"By installing the 4,400 kWp solar PV systems in existing factory buildings, including buildings rented out with comprehensive services, we expect to achieve annual savings of up to RM2.79 million," said Sow.
