TNB boost for mangrove forest rehab project

KUALA LUMPUR: Tenaga Nasional Berhad (TNB) has planted 19,800 mangrove saplings through a mangrove forest rehabilitation programme in the areas around the Sultan Azlan Shah Power Station, Manjung and in Kinta, Perak since 2013.

In a statement, TNB said the locations were Pasir Panjang in Kinta district and Kampung Sungai Tiram and Kampung Sungai Limau in Manjung.

"This number is part of the 23,700 mangrove saplings planted by TNB in states in the peninsula apart from Perak.

"They include the coastal areas of Perlis, Penang, Selangor and Negri Sembilan," the statement said.

"This continuous initiative is in line with TNB's commitment in tackling environmental, social and governance issues towards conserving the flora and fauna species as well as providing new habitats for wildlife and preventing coastal erosion in the long run.

"It is also expected to benefit the local communities in terms of developing new economic opportunities through ecotourism activities and enriching the marine life, which has the potential of increasing the income of fishermen," it added. **Bernama**
